Data Browsers for STEREO

- Rapid meaningful access to the data
  - visualize and interpret
  - flexible and tailorable
  - machine readable output

- High quality plots
  - suitable for meetings and papers
  - well labeled, postscript plots
  - can be downloaded to user

- Plots that give insight above and beyond raw data
  - dynamic spectra
  - cross instrument contributions e.g. pressure

- Analysis capability
  - user controlled
  - flexible

Proposed Design for Data Browser

- Online archive with plot/analysis package but no canned plots

- User requests plot or data download

- User selects quantities from menu.
    - Some predesigned pages
    - Some pages assembled by requestor

- User selects time resolution/time span
